Subject: Re: NVT Request for Data

Then I suggest it be redacted from the DSEIS.

> We have diligently reviewed the specific information request for the groundwater model files that are described on Page 14 of the Arcadis report. This information is not something that we currently have or have ever had in our possession. We have determined that this information does not constitute underlying data used by the contractor in developing any report used for the preliminary draft supplemental environmental impact statement. We have confirmed that our contractor (including subcontractors) did not see the model file and/or use it to develop the preliminary draft. In addition, it is not normal practice for the contractor to run another company's model for NEPA work. Therefore, we have determined that the specific information requested by the Native Village of Tyonek does not constitute any of the forms of data or information that the cooperating agencies are entitled to review under the terms of the memorandum of agreement. We are still reviewing NVT's request for a time extension to review the preliminary draft (letter dated December 21, 2015).
